

Workforce Reinvention Blueprint

Telecommunications Industry

How Al and Automation will Transform the Workforce Based on Reejig's Proprietary Work OntologyTM Intelligence

How Al is Reinventing the Telecommunications Industry

The Telecommunications Industry is a colossal force in the global economy, valued at USD 1.74 trillion in 2022, with a projected growth to USD 2.3 trillion by 2028 at a CAGR of 5-6%.

Top 3 Concerns Facing Telco CEOs in 2025

- 1. Cost Management Amidst 5G Expansion
- 2. Labor Shortages and Workforce Reskilling
- 3. Regulatory and Cybersecurity Pressures

Focus Area 1: Workforce Shifts

Projected Workforce Shifts in 2025 and Beyond

Where Al and Automation Will Drive Operational Effectiveness

Al-Driven Network Management

The implementation of AI and automation in network management has transformed how telecom companies maintain and optimize their networks.

This shift leads to 20-30% improvement in network performance through predictive analytics and fault detection.

Automation in Customer Service

Telecom companies are deploying Alpowered chatbots and virtual assistants to automate routine customer interactions. By 2025, Al systems are expected to manage up to 70% of basic customer inquiries.

The automation of repetitive tasks is projected to result in a 40-50% improvement in customer service efficiency, enabling faster issue resolution and enhanced customer satisfaction while reducing the need for manual intervention.

Rise of Automated Cybersecurity Operations

As 5G and IoT networks grow, the complexity of securing these systems has increased. Al tools are being employed to automate real-time threat detection.

Al-powered cybersecurity tools can achieve a 30-40% improvement in operational efficiency, streamlining processes like threat detection and incident response.

Focus Area 2: Roles Impacted by Al

Key Roles Impacted and Reskilling Pathways for 2025

How Impacted Roles Can Transition to In-Demand Roles

Job Family

Customer Service

Impacted Roles

Representative,
Call Center Operator,
Customer Inquiry Agent

Customer Service

In-Demand Transition Roles

Al System Supervisor,
Customer Success Specialist

Reskilling Pathways

Al System Management (3-6 months)

Customer Success Specialist
Training

(3-6 months)

Administrative Support

Data Entry Clerk,
Billing Specialist,
Scheduling Assistant

Process Automation
Supervisor, Data Analyst

RPA Certification

(4-6 weeks)Data Analytics Training(6 months)

Field Technicians

Routine Network

Maintenance Technician,

Network Diagnostic

Specialist

Al-Assisted Network
Engineer, IoT Specialist

Al-Powered Network

Management (6-12 months)

IoT Specialization Certification

(6 months)

Focus Area 3: Driving Operational Effectiveness

2025 Al Strategies to Boost Operational Effectiveness

Prioritized Roles for Al Transformation based on Al Potential Index, Operational Efficiency Index & Time to Benefit Realization

1

Customer Service Representatives

This role automates routine customer service interactions, saving costs by reducing the need for human labor and improving response times, leading to enhanced customer satisfaction.

With an AIPI of 1.6 and an OEI of 70%, this role is a top priority for investment because it offers quick operational efficiency gains and significant cost reductions with minimal risk.

Al Potential Index (AIPI) Score: 1.6

Breakdown: Potential Automation Proportion: 80%, Al Maturity/ Risk Adjustment: 0.90, Current Automation Proportion: 45%

Operational Efficiency Index (OEI) Score: 70%

Breakdown: Time Savings: 40%, Cost Savings: 30%, Process Improvement Factor: 1.4

Time to Benefit Realization: Short-Term (0-6 months)

Immediate improvements of 20-25% efficiency through basic Al deployment.

2

Network Monitoring Manager

perform predictive maintenance, saving operational costs and improving network reliability.

This role uses Al to automate network monitoring, optimize traffic, and

With an AIPI of 1.49 and an OEI of 71.5%, this role is a top priority for investment because it offers substantial efficiency improvements and cost savings over the medium term.

Al Potential Index (AIPI) Score: 1.49

Breakdown: Potential Automation Proportion: 70%, Al Maturity/Risk Adjustment: 0.85, Current Automation Proportion: 40%

Operational Efficiency Index (OEI) Score: 71.5%

Breakdown: Time Savings: 30%, Cost Savings: 25%, Process Improvement Factor: 1.3

Time to Benefit Realization: Short-Term (6-12 months)

Basic Al deployment achieves 15-20% efficiency improvements.
